

EcoCircle

Turning sustainable actions into usable rewards

EcoCircle is a simple sustainability rewards platform where users earn points for environmentally positive actions like eco-driving, EV driving, and solar generation.

TEAM NAME

SHUTDOWN

BUILDERS

Ayush, Pragna, Poornima, Rishita

HACKATHON

Advaya

THE PROBLEM

People want to act sustainably, but there is no simple reward loop for everyday positive actions.

Invisible Effort

Sustainable behaviour often feels invisible and unrewarded. There is no feedback loop to show the impact of individual choices.

No Incentive

Actions like eco-driving, EV usage, and solar generation are rarely connected to daily incentives or tangible benefits.

The Missing System

Most people are willing to participate, but need a system that is:

Simple

Motivating

Visible

Rewarding

“

"Sustainability should not feel like sacrifice. It should feel valuable."

OUR SOLUTION

A circular rewards platform for nature-positive behaviour

Earn Eco Points

Eco-driving habits

EV driving & charging

Solar power generation

Redeem Points

Eco-friendly products

Service discounts

Sustainability rewards

Recognition-based perks

Do good for nature

Earn points

Use points in marketplace

PROCESS FLOW

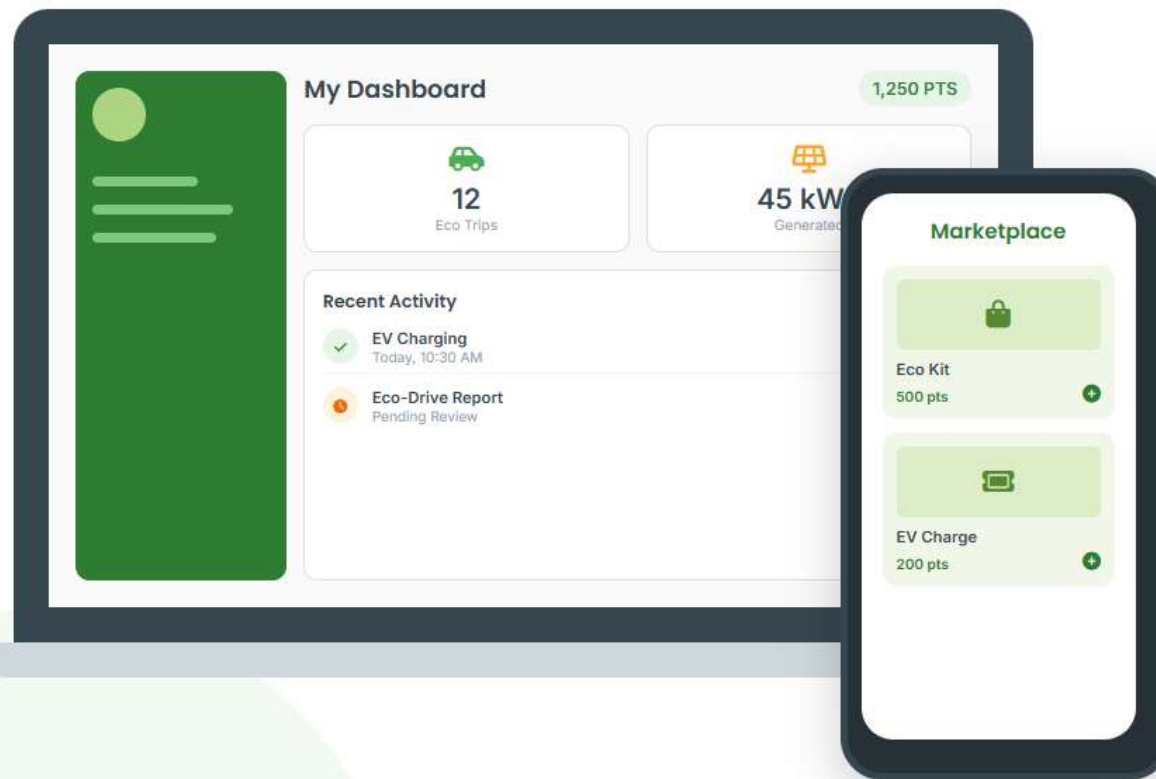

How EcoCircle Works

The platform turns sustainability into a simple, trackable, and rewardable experience.

PRODUCT DEMO

What We Built

User Dashboard

Visual tracking of total points, eco-badges earned, and real-time impact metrics.

My Activities

Simple submission history with transparent approval status updates.

Circular Marketplace

Redeem points for eco-friendly products, discounts, and sustainability perks.

Leaderboard

Gamified engagement comparing green actions with community peers.

Admin Panel

Backend tools to review proofs, approve activities, and manage rewards.

Tech Note: EcoCircle is designed as a simple, scalable prototype that can later integrate with real-world sustainability data sources (APIs).

IMPACT & VISION

Why EcoCircle Matters

Immediate Impact

-  Encourages positive behaviour change
-  Makes sustainability visible and rewarding
-  Builds active community participation
-  Supports a circular economy model
-  Extensible to schools, communities, and green programs

The Bigger Vision

Mobility Rewards

Incentivizing public transport and EV usage at scale.

Climate Action

Connecting individual habits to global climate goals.

Campus Programs

Gamifying sustainability for universities and schools.

Local Ecosystems

Powering local green incentive networks for cities.

The long-term opportunity is larger than a rewards app — it's a **behavioral infrastructure** for nature-positive action.

Tech Stack & Build Architecture

Lightweight web prototype focused on demonstrating user journey, reward loop, and marketplace experience

Frontend

✓ Active

- **HTML-generated web application** - Modern component-based UI
- **Responsive pages** for dashboard, marketplace, leaderboard, and admin review
- **Clean visual design** for quick product demonstration

Data & Logic

✓ Active

- **Mock/static sample data** for users, activities, rewards, and leaderboard
- **Points-based reward logic** with activity approval flow
- **Google Form** used as external activity submission layer

Development Workflow

🔄 In Progress

- **Built in HTML** for rapid prototyping
- **Code can be synced to GitHub** and cloned locally
- **Can connect to backend services** like Supabase or Lovable Cloud

</> Develop

↻ Sync

☁ Deploy

Prototype Approach

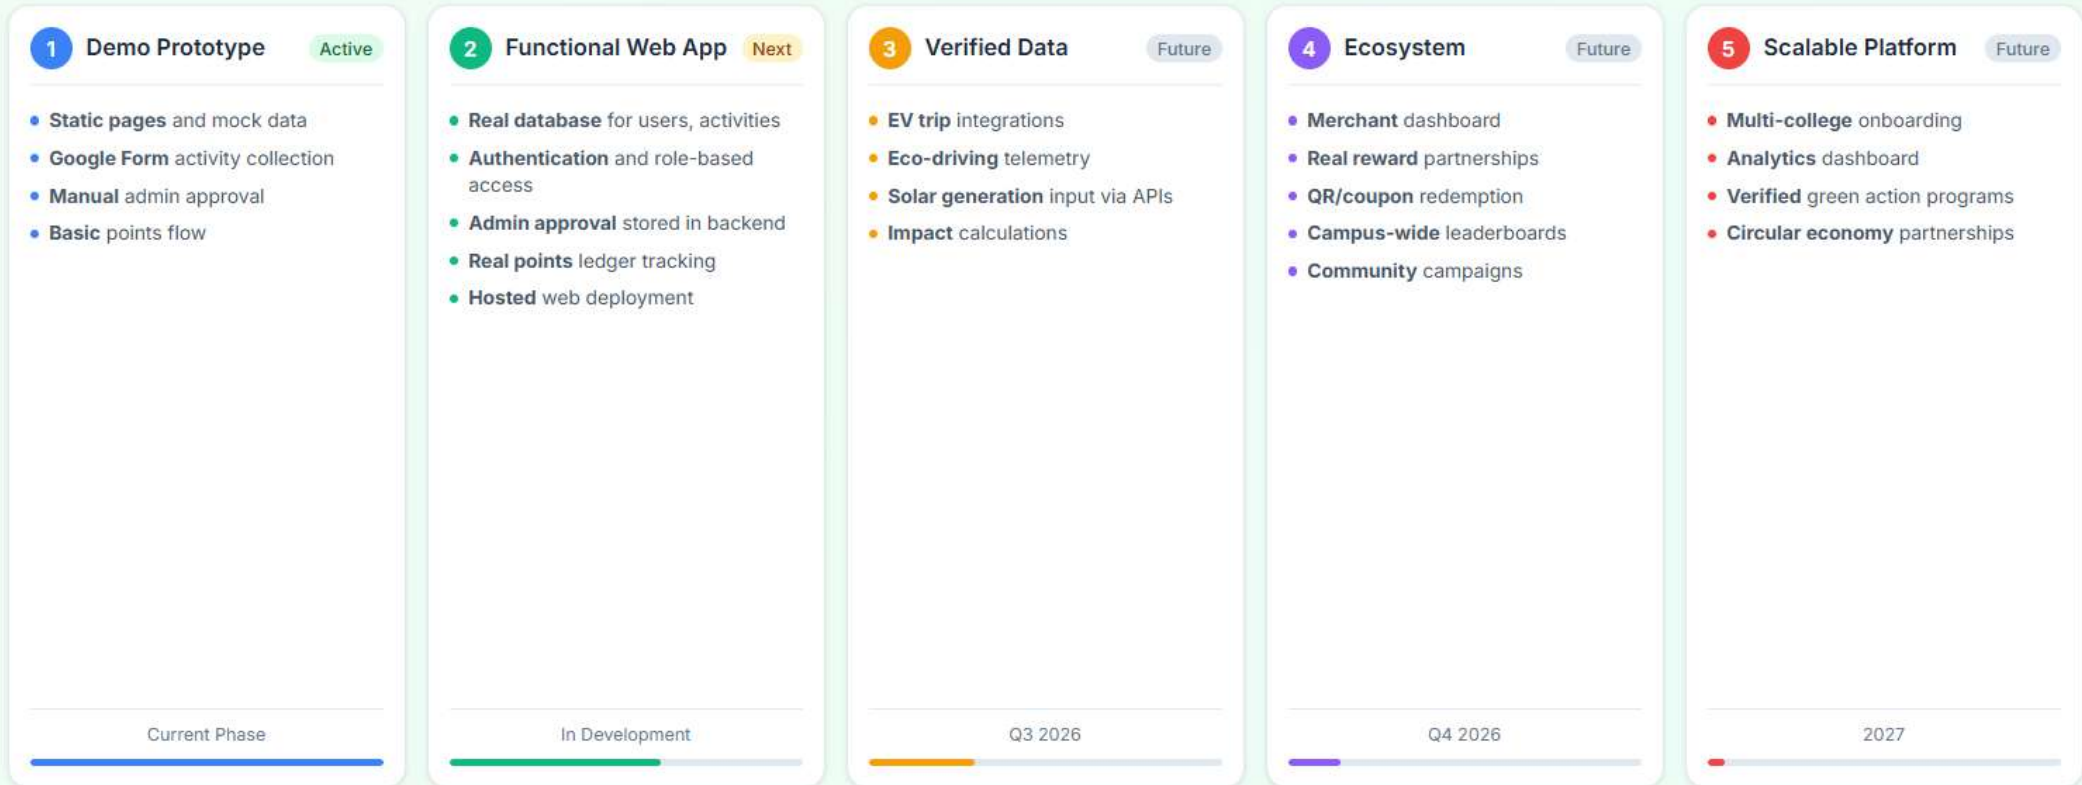

- **Lightweight web prototype** focused on validating user journey
- **Reward loop demonstration** and marketplace experience
- **Not a heavy production system** - built for quick validation

💡 **Key Insight:** This architecture helped us move quickly from idea to usable demo while keeping the system easy for student developers to understand and extend.

**Current Status:** Prototype ready for testing and validation✓ Functional🕒 In Development

Future Technical Roadmap

5-phase evolution from demo prototype to scalable sustainability platform

Vision: Evolve EcoCircle from a hackathon prototype into a verified sustainability incentive platform for campuses and communities, with real-world impact tracking and circular economy integration.

Long-term Goal: Scalable platform with multi-institution support

✓ Phase 1 Complete

🕒 Phase 2 In Progress

FUTURE SCOPE

What's Next

Real EV / Telematics Integration

Automated point verification via vehicle APIs

Brand & Merchant Partnerships

Expanding the reward catalog ecosystem

Solar Energy Tracking

Direct integration with smart home meters

Community Campaigns

Group challenges and neighborhood goals

QR-Based Reward Validation

Physical redemption at partner stores

Local Green Economy

Collaborations with city sustainability programs

EcoCircle shows how sustainability can move from **awareness to action** — by making positive behavior visible and rewarding.

Thank You

Turning sustainable actions into usable rewards.
